With Music Video Hits you can listen to computer-generated versions of your favorite hits. Complete with bass, rhythm, melody and harmony. And use an optional joystick to select and change the instrument sounds and special effects that play each part.

And all the time the songs are playing at any tempo you choose, you're watching exciting graphics of dancing notes.

By adding the Sight & Sound Music Processor, you can choose from even more instruments and electronic sound effects to play these hits. Or play along using your computer's keyboard.

Sight & Sound Computer Song Albums are also compatible with the Music Video Kit, that lets you create your own animated graphics.
